## eBooks

The library has recently purchased two eBook packages to assist you in your research. These eBook packages contain nearly 300 titles of subjects essential to the field of veterinary medicine. Access these titles through the library's online catalog or search them via Science Direct or Wiley.

Many of these titles are also included in the required and recommended reading lists for veterinary students.

All titles are available to download for MSU faculty, staff, and students and have an unlimited number of users, which means multiple users can check them out at the same time.
