Featured Book of the Month

Color Atlas of Veterinary Anatomy: Dog and Cat

By Stanley Done, Peter Goody, Susan Evans, and Neil Stickland

If you are looking for a book that presents a unique photographic record of dissections showing the topographical anatomy of the dog and cat: this is the atlas for you! Part of a comprehensive 3-volume set that also covers Ruminants (Volume 1) and The Horse (Volume 2), the Color Atlas of the Dog and Cat takes a complete look at virtually every aspect of veterinary anatomy. With this book you will be able to see the position and relationships of bones, muscles, nerves, blood vessels and viscera that go to make up each region of the body and each organ system. Rich with full-color photographs and drawings of dissections prepared specifically for these texts, each book in the series illustrates regional surface features photographed before dissection, then gives high-quality complementary photographs of articulated skeletons.

Getting the Most out of Scopus

June 8, 3 pm

Scopus is a multidisciplinary database with strong coverage in sciences, engineering, and social sciences. This workshop will show advanced features of Scopus such as cited reference searching, setting up folders, creating search alerts, and maintaining a Scopus author page. Other search tips will be provided as well.

Introduction to Mendeley

June 14, 3 pm

Mendeley is a citation manager that allows you to create your own personal database of references by importing records from research databases such as Scopus and others. MSU students, faculty, and staff have access to the Mendeley Institutional Edition. Learn how to build a Mendeley library, share references with other researchers, and use the plug-in to cite as you write.

Finding and Managing Sources for Systematic Reviews and Meta-Analyses

June 16, 3 pm

Are you thinking of conducting a systematic review or meta-analysis? An essential step is developing effective searches across multiple databases and managing those references in a way that allows them to be evaluated effectively. This introductory workshop provides tips and tools to effectively implement these steps in the review process.
