BAY ST. LOUIS, Miss. — The barge, Little Lake, brings the S-II-T, all-systems test model of the second stage of the Saturn V Apollo space vehicle, through the Bascule Bridge at the NASA Mississippi Test Facility in Hancock County, Mississippi, on the historic east Pearl River. The stage arrived from Seal Beach, California where it was assembled. The S-II stages will be thoroughly checked out and test fired at MTF before being shipped to Cape Kennedy, Florida, for an active role of launching the first American astronauts to the moon.
