Dr. Stewart W. McClelland,

L. M. U.,

Harrogate, TENN.,

Dear Stewart: :

In the rush to get the FALS to you and in the mail. I forgot to answer your letter of the 7th. The breaking of a bone in the frail little Jim, is no small affair, and we trust that it will never inconvenience him in his lifetime. We also trust that all is well with his Dad in the So Pacific.

Just pasted in Townsend letters and his physog into the MSS FAL. Am covering the volumes in black paper stock. Added a Vol. 86. This contains newspaper clippings, which go along as a biographi-cal story. Entirely personal, and illustrative of the wide ac-tivities of BW. While the whole set is a register of my life-work, these accumulations of news items about me are corelated with FAL. I mention Townsend as you tell me of his visit to L.M.U. Wonder how his Cassius Clay book is coming along.

I sent you the new WISE circular. I mentioned to Gerald the matter of being a sale agency, re L.M.U. For instance, the WISE book is an easy selling item, as pointing out just one. And with the hundred other titles. Regarding the Barton item-I'll send a copy to Townsend. On approval.

Under separate cover goes some more payments on my indebtednesses. Some bookplates for you. Two Bollinger prints for Bob and Gerald. The plate is already showing signs of wear. An d a print of the little Saluting Kid.

Our love to youall from Doris and me,

Barney
