

11/16 - 11/20

	Beginning	End
 <p>Julie Shedd jshedd@library.msstate.edu</p>	<p>Goals</p> <ul style="list-style-type: none"> • Finish content standards FOR REAL THIS TIME • Work on ArchivesSpace 	<p>Accomplishments</p> <ul style="list-style-type: none"> • Content standards draft - finished and sent for review. Tweaks and additions still needed. • Worked on ArchivesSpace <ul style="list-style-type: none"> • Troubleshooting a couple of emerging issues • Started studying the users manual and tutorials at LYRASIS • Joined a users-group listserv. Almost immediately a similar issue to ours was posted. No fix yet.
	<p>Notes</p> <ul style="list-style-type: none"> • MAGNOLIA in Clever - will need to discuss with team separately. • We discussed how best to integrate the collections info from LDC. • Talked about the photos being taken by OPA - possibly things like ScholComm and GSS don't need to be Locations, as they're more "outreach"-type departments. This way no photos are needed for them. The ETD office is a place people actually go so we should take a picture of the office either outside it or just inside it - something people will recognize when they go there. • We will evaluate the CSE group's midterm presentation - their final presentation is Monday afternoon and we'll evaluate again, and decide what to do for next semester. 	
 <p>Brock Balducci bbalducci@library.msstate.edu</p>	<p>Goals</p> <ul style="list-style-type: none"> • Work on writing more documentation. • Fix local dev environment issues. • Try and come up with a gameplan for working closely with Josh once he starts fulltime. <ul style="list-style-type: none"> • What will it look like if we are remote? • What about if we are in the office? • What about if its a hybrid situation of both? 	<p>Accomplishments</p> <ul style="list-style-type: none"> • Wrote stand in documentation for ETD Reports based on my past notes. • Created a virtualized ubuntu dev environment to negate the weird windows subsystem for linux issues i was having. <ul style="list-style-type: none"> • Time will tell how much better this is. • Began working through a remote pair programing plan for Josh and I. This will need to be test and then documented as well.
	<p>Notes</p> <ul style="list-style-type: none"> • Documentation for ETD Report tool will be updated next week when I have to actually touch it again. • This will be one of the last things to write documentation for, leaving the new Chronica as really the last thing once it is done in the new year. • After all the documentation is written I will go back and actually create a real documentation standard and then go back and make sure they all fit that standard. 	
 <p>Troy DeRego tderego@library.msstate.edu</p>	<p>Goals</p> <ul style="list-style-type: none"> • Create a search selection interface for the home page based on team discussions, user feed back, and peer institution examples • Continue component documentation in the pattern library and find a place to host the static HTML • Attend Interaction Design Foundation webinar on "Behavioral Design" 	<p>Accomplishments</p> <ul style="list-style-type: none"> • Created a search selection interface (see notes) • Attended Data Services position presentations • Attended Behavioral Design webinar • Created outline of drop down lists for main nav bar

Notes

- I created a search box based on the example from UGA Libraries. The box itself is simple and clean, but with the inclusion of links to the many other search tools and services the page becomes cluttered and does little to help direct the user unless they know what they are looking for.
- The reason this solution appears successful on the UGA Libraries site is that links to search tools and services are arranged in the drop down lists under the main nav bar, allowing the area surrounding the search box to remain clean and clear.
- I believe this can be employed in our own main nav bar. I will focus on organizing the drop down lists in the prototype.

Students

Tickets as assigned. We got them Lazyguys gift cards in lieu of the usual bags. They were a hit. 🍌

Lantern Project

Manikandan reports that he should have a working UI next week

Tickets

Completed
